// OBJECTIVE

Seeking position of a Front End Developer or Full-stack Javascript Developer in a product-based software company. Where I would be able to put to use the knowledge gained in the web development and push the limits of the web.

// WORK EXPERIENCE

Biglabs

Jan 2013 - May 2016

Senior Web/Front End Developer

- Becoming the main Web Dev for Biglabs (the only one for a long time), involved in many projects, products.
- Self-taught latest front-end technologies to develop cutting-edge websites/web apps with great UI/UX.
- Being interviewer to help the company recruits new members.

Fisoft

Oct 2009 - May 2012

Java Developer

- Working in a team to build eBOSS (an ERP system) for nearly 3 years.
- Developing, debugging and testing throughout software development activities. Participating in analysis and design phases.
- Implementing task lists, estimating deliver assignments as functional specifications, quality standards, and project schedules.
